

# Xpertdoc Smart Forms

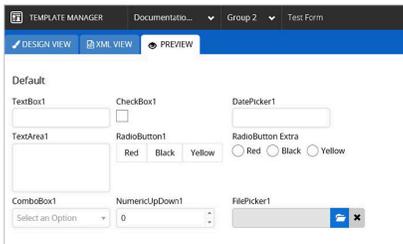

## The Better, Faster, Guided Digital Form Solution

### Web-based, Dynamic Data Capture

Xpertdoc's intuitive Smart Forms are responsive, web-based or embedded data capture forms that enable your customers to easily enter and submit their information electronically, through a better, faster and guided process.

By exchanging manual, paper-based and error-prone processes for a digital version, you benefit from lowered resource costs, improved internal efficiencies and memorable customer experience.

## Smart Forms' Key Features

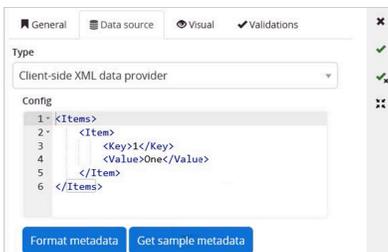

### Configurable Web Forms

Configure functions such as data fields, check-off options, dropdown menus, date pickers, and sub forms. Fields and options can be tagged as mandatory and be accompanied by dynamic in-process guidance.

### Advanced Business Rules

Configure logic-based business rules to control information presentment; relevant options are displayed based on input provided by customers.

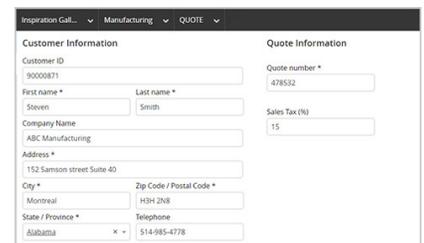

### Dynamic Data Sources

Link dynamic lists of data – products, pricing, options, etc. – pulled from your enterprise core systems to dropdown menus embedded in Smart Forms.

### Dynamic Data Capture

Captured data can be directly fed into your enterprise core systems, such as Microsoft Dynamics 365/CRM, ERP, CPQ, Excel, policy administration, and more. Auto-completing fields can pull input stored in connected systems.

## Embedded Multimedia Content

Incorporate informative multimedia content to explain and promote additional products and services, options, etc.

## Work in Progress Saving

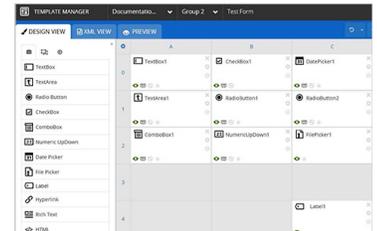

You can work on a Smart Form, save your progress intermediately and continue at a later time until form completion.

## Responsive Design

Leveraging HTML5, Smart Forms are responsive and easily accessed with any mobile device or computer. Your customers can start a data capture process from one device and finish on another, in a seamless and consistent experience.

## Intuitive Design Interface

Build Smart Forms tailored to your needs using an intuitive design interface that leverages drag and drop capability.

A screenshot of a Smart Form titled 'RECEIVING PARTY'. The form is displayed on a device screen. It includes the following fields: 'Receiving Party Name \*' (with a dropdown menu), 'Saturn Tech', 'Full Name \*' (with a dropdown menu), 'John Smith', 'Title \*', 'CFO', 'Address \*' (with a dropdown menu), '7362 Terresta Street, New Brunswick, CA', 'Date \*' (with a dropdown menu), '2017-11-16 09:15', and 'Signature' (with a blue 'X' icon). To the right of the form is a small icon of a document with a signature line.

## Integrated e-Signature

Capture electronic, legally-binding signatures in minutes, on any device, with native e-signature support.

## Omni-channel Delivery

You can deliver completed Smart Forms through your customers' preferred channel, including email, HTML, SMS, fax, and print.
